

## Moving Granite and Increasing Productivity with Gorbelt Work Station Cranes

**Industry:**

Precision work with natural stone

**Product:**

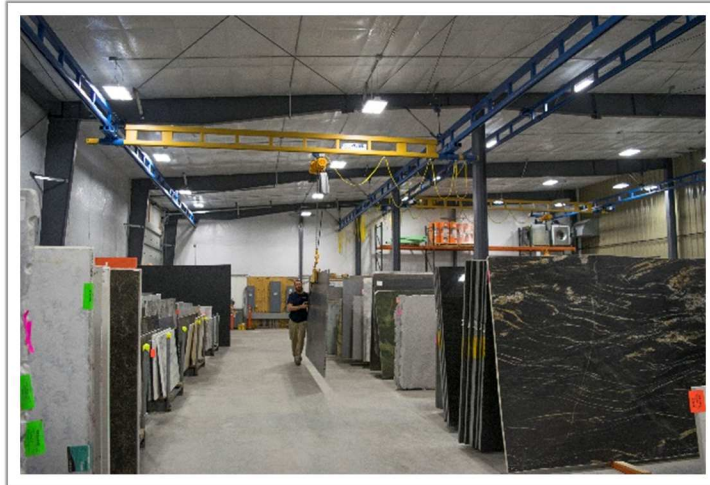

Natural stone slabs

**The Problem:**

Two operators were needed to move large stone slabs with a forklift

**The Solution:**

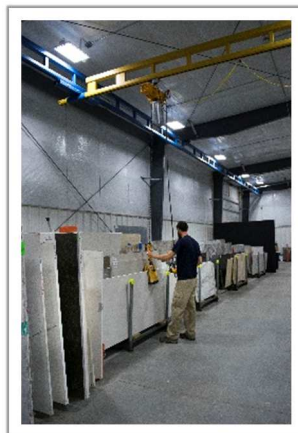

2 Side by Side Gorbelt Work Station Cranes

### Gorbelt® Crane Helps Stone Company Work Smarter, Not Harder

Before the Gorbelt® Work Station Cranes were installed at Morningstar Stone and Tile, it took two employees to move the stone slabs utilizing a forklift with a clamp attachment. One worker drove the forklift while the other had to walk along side to guide the slab. Although safety was a key factor in installing the Gorbelt® Cranes, the company was thrilled to learn a secondary benefit; increased productivity.

Now the two operators that were tied up moving the slabs, can operate independently on their own Work Station Crane, increasing safety and productivity.

Nick Brown, Production Manager stated, "We like to say around here work smarter, not harder. Having the Gorbelt® Crane has helped us a lot with that."

According to the team at Morningstar Stone and Tile, the addition of the Gorbelt® system has been instrumental in the expansion and growth of the company as well.
