Section 1: Identification of the Substance/Mixture and the Company/Undertaking

Product Name: W/R AIR DRY ENAMEL - OUTDOOR YELLOWProduct Code: 89-3505Continental Products, LTDEmail: info@continentalprod.com1150 East 222nd StreetPhone: 216-531-0710Euclid, OH 44117 USAEmail: info@continentalprod.com

Chemtrec: 1- 800-424-9300 Chemtrec Global: 1-703-741-5970

Product Use: FOR INDUSTRIAL USE ONLY

Section 2: Hazard(s) Identification

GHS Ratings:

ononanige	<u> </u>					
Flan	nmable liquid	4	Flash point >= 60°C (140°F) and <= 93°C (200°F)			
Skin	n corrosive	2	Reversible adverse effects in dermal tissue, Draize score: >=			
			2.3 < 4.0 or persistent inflammation			
Eye	corrosive	1	Serious eye damage: Irreversible damage 21 days after			
			exposure, Draize score: Corneal opacity >= 3, Iritis > 1.5			
Muta	agen	1B	Known to produce heritable mutations in human germ			
			cellsSubcategory 1B, Positive results: In vivo heritable germ			
			cell tests in mammals, Human germ cell tests, In vivo			
			somatic mutagenicity tests, combined with some evidence of germ cell mutagenicity			
Car	cinogen	1B	Presumed Human Carcinogen, Based on demonstrated			
Our	linogen	1D	animal carcinogenicity			
Rep	roductive toxin	2	Human or animal evidence possibly with other information			
GHS Hazards	S					
	_					
H22		Combustible liquid				
H31		Causes skin irritation				
H31		Causes serious eye damage				
H34		May cause genetic defects				
H35		May cause cancer Suspected of damaging fertility or the unborn child				
H36		Suspected of dan	naging tertility of the unborn child			
GHS Precaut	tions					
P20	1	Obtain special ins	structions before use			
P20	2	Do not handle until all safety precautions have been read and understood				
P21	0	Keep away from heat/sparks/open flames/hot surfaces – No smoking				
P23	5	Keep cool				
P26	4	Wash thoroughly after handling.				
P28	0	Wear protective gloves/protective clothing/eye protection/face protection				
P28	1	Use personal protective equipment as required				
P31		Immediately call a POISON CENTER or doctor/physician				
P32	1	Specific treatment, see supplemental first aid information.				

P362	Take off contaminated clothing and wash before reuse
P302+P352	IF ON SKIN: Wash with soap and water
P305+P351+P338	IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing
P308+P313	IF exposed or concerned: Get medical advice/attention
P332+P313	If skin irritation occurs: Get medical advice/attention
P370+P378	In case of fire: Use alcohol resistant foam, dry chemical, carbon dioxide (CO2), dry sand for extinction
P405	Store locked up
P403+P235	Store in a well ventilated place. Keep cool
P501	Dispose of contents/container in accordance with
	local/regional/national/international regulations. Manufacturer/supplier or the competent authority to specify whether disposal requirements apply to contents, container or both.

Signal Word: Danger

Unnecessary exposure to any chemical should be avoided. NOTICE--Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling contents may be harmful or fatal. Do not breathe vapors or spray mist. Wear an appropriate, properly fitted respirator (NIOSH/MSHA approved) during and after applicable limits . Follow respirator manufacturer's directions for respirator use.

Chemical Name	CAS number	Weight Concentration %
Water	7732-18-5	46.00%
Trizinc diphosphate	7779-90-0	5.00%
2-Butoxyethanol	111-76-2	5.00%
Titanium dioxide	13463-67-7	4.00%
2-Butanol	78-92-2	3.00%
Ammonium hydroxide	1336-21-6	1.00%
Distillates, petroleum, solvent-dewaxed heavy paraffinic	64742-65-0	0.20%

Section 4: First Aid Measures

After Inhalation: Immediately supply fresh air. Keep patient in restful and comfortable position for breathing. If required provide artificial respiration, although this may be dangerous. Consult doctor if symptoms persist.

After Eye Contact: Immediately rinse opened eye(s) for several minutes under running water. Use lukewarm water if possible. Remove contact lenses if worn. Get medical attention.

After Skin Contact: Remove contaminated clothing and shoes. Immediately wash with water and soap, rinse thoroughly. If skin irritation continues, consult a doctor.

After Swallowing: Immediately get medical attention. Call a poison center or physician. Rinse out mouth and then drink small amounts of water. Do not induce vomiting as this may be dangerous. Aspiration hazard if swallowed,

can enter lungs and cause damage. If vomiting occurs, the head should be kept low to avoid vomit entering the lungs. Maintain an open airway.

Notes to Physician: Treat symptomatically.

Section 5: Firefighting Measures

Flash Point: 63 C (145 F) LEL: 1.00

UEL:

Extinguishing Media:

Alcohol resistant foam Fire-extinguishing powder Carbon dioxide

Special Hazards Arising from the Substance of Mixture:

Formation of toxic gases is possible during heating or in case of fire. Check flammability in section 2 of this sheet. Mixture in sealed and heated containers may cause explosion hazard.

Spray booth filters, rags, and clean-up materials may spontaneously combust if exposed to air while drying.

Hazardous Combustion Products may include the following:

Carbon oxides. Metal oxide(s). Nitrogen oxides.

Vapors are heavier than air and may spread along floors. Vapors may travel considerable distance to source of ignition and flash back.

Advice for Firefighters:

Clear fire area of unprotected personnel. Containers that are exposed to intense heat should be cooled with water. Avoid spreading burning liquid with the water used for cooling purposes. Do not enter fire area without protective gear. Fight fire from safe distance or a protected location.

Fire Equipment:

Wear self-contained respiratory protective device. Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

Section 6: Accidental Release Measures

Personal precautions, protective equipment and emergency procedures:

Wear protective equipment. Keep unprotected persons away. Keep away from ignition sources. Wear protective clothing. Keep from contacting skin or eyes. Avoid breathing vapors, mist, or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. If any equipment is necessary, ensure that it is non-sparking and electrically-protected.

Environmental precautions:

Do not allow product to reach sewage system or any water source. In case of seepage into the ground inform responsible authorities Prevent from spreading (e.g. by damming-in or oil barriers). Keep contaminated washing water and dispose of appropriately

Methods and material for containment and cleaning up:

Ensure adequate ventilation

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Dispose of contaminated material as waste.

Do not flush with water or aqueous cleansing agents.

Send for recovery or disposal in suitable receptacles according to local, state and federal regulations.

Section 7: Handling and Storage

Handling:

Apply proper ventilation, possibly combined with local exhaust. Do not eat, smoke or drink during use. For personal protection see Section 8. Keep away from sources of ignition. Keep material out of reach of children. Wash thoroughly after handling.

Information about protection against explosions and fires:

Keep ignition sources away - Do not smoke.

Protect against electrostatic charges by bonding and grounding product containers before and during material transfers. Keep respiratory protective device available.

Dispose of filters, waste, rags and clean-up materials in closed, airtight containers.

Conditions for safe storage, including any incompatibilities:

Storage:

Keep away from sources of ignition - no smoking. Store in a cool, well ventilated place. Keep in original, closed packaging. Comply with governmental regulations.

Keep container tightly closed. Store out of direct sunlight, between 40 and 90F.

Specific end use(s): For professional use only.

Section 8: Exposure Controls/Personal Protection

Ventilation:

All ventilation should be designed in accordance with OSHA standard (29 CFR 1910.94). Use local exhaust at filling zones and where leakage and dust formation is probable. Use mechanical (general) ventilation for storage areas. Use appropriate ventilation as required to keep Exposure Limits in Air below TLV & PEL limits.

Personal Protective Equipment/General Protective and Hygienic Measures:

Respiratory Protection:

In outdoor or open areas use (NIOSH/MSHA approved) mechanical filter respirator to remove solid airborne particles of overspray during spray application. In restricted ventilation areas use (NIOSH/MSHA approved) chemical-mechanical filters designed to remove a combination of particulate and gas and vapor. In confined areas use (NIOSH/MSHA approved) airline type respirators or hoods. Respiratory protection may also be necessary in any later manufacturing operations in which the product may become airborne in the form of vapor or dust.

Protective Gloves:

Protective gloves are required for prolonged or repeated contact. Wear resistant gloves such as natural rubber, neoprene, buna N or nitrile. An apron should be worn to avoid skin contact. (Consult your safety equipment supplier.)

Eye Protection:

Avoid contact with eyes. Wear goggles if there is a likelihood of contact with eyes. (Consult your safety equipment supplier.) Eyewash stations and safety showers should be readily available in use and handling areas. Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.

Body Protection:

Chemically resistance gloves, apron and safety goggles are recommended. Type of protective equipment should be selected based on concentration amount and conditions of use of this material.

Contaminated Gear:

Dispose of in accordance with official regulations.

Section 9: Physical and Chemical Properties

Boiling Range 100 to 3000 °C Coating VOC (as supplied) 0.78 Ib/gl

Specific Gravity (SG) 1.157 Coating VOC (EPA 1.72 calculation) lb/gl

Section 10: Stability and Reactivity

Product Stability:

Product is stable under normal circumstances.

Incompatibilities:

Avoid contact with strong oxidizing agents.

Hazardous Decomposition:

Thermal decomposition may form toxic materials; carbon dioxide, carbon monoxide, etc. Thermal decomposition may form toxic materials; carbon dioxide, carbon monoxide, various hydrocarbons, etc.

Hazardous polymerization will not occur.

Section 13: Disposal Considerations

Waste treatment methods:

Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

Spray booth filters, rags, and clean-up materials may spontaneously combust if exposed to air while drying. These materials should be stored in closed metal or water-filled containers.

Disposal of this product and any by-products must at all times comply with local, state and Federal regulations for hazardous wastes. All entities that store, transport or handle hazardous waste must take the necessary measures to

prevent risks of pollution, release into the environment or damage to people and animals.

Contaminated Packaging:

Waste packaging should be recycled. Care should be taken when handling emptied containers that have not been cleaned. Empty containers retain some product residues. Vapor from that residue may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers.
