We Improve People's Lives

Gorbel's mission is simple: We improve people's lives. That mission guides everything we do, from the products and service we provide to our outside customers to the tools we create for our sales force and the work environment we foster for our employees.

We are a manufacturer of overhead material handling and fall protection products in the industrial sector, and gait and balance therapy products in the rehabilitation world. We're on the cutting edge of manufacturing; a thriving, growing company that is constantly seeking out new ways to innovate and elevate our products and our processes.

Who We Are

We have been improving lives since 1977. Gorbel overhead material handling systems are used around the world to help workers easily move large pieces during the assembly process. Our Tether Track fall protection products keep people safe while working at heights, without the fear of falling.

And Gorbel's newest innovation, SafeGait®, applies our proven lifting technology in a physical therapy setting, supporting patients' body weight as they learn to walk again, keeping both patients and therapists from injuring themselves, and helping patients recover more quickly.

From putting an engine in a racecar to assembling the giant pieces of a 747 to protecting people from falls, Gorbel can do it all.

“

I believe what makes Gorbel different from other companies is the higher level of pride and commitment that's displayed from every employee. When others just say, 'It's good enough', we say, 'Let's make it better!'

”

Evan Wong
Systems Administrator

A Growing Global Presence

We started as a small company in Fairport, NY. Since then, we've grown to an international company with hundreds of employees worldwide. Our state of the art headquarters is now in Victor, NY, with additional manufacturing plants in Pell City, AL and Tianjin, China.

We're supported by a large network of highly trained salespeople focused in North America, Europe, and Mexico, and we are poised to continue expanding our global reach in the coming years.

“ It's the people that make Gorbelt what it is, and that's why people stick around for 10, 15, 20 years. ”

Why Work Here

Gorbel is committed to providing our customers with the highest quality equipment and services available today. And we believe that commitment begins with hiring the best people. Opportunities at Gorbel include manufacturing positions such as welders, machine operators, shipping and receiving, and material handlers. We also employ office professionals in customer service, software and mechanical engineering, product development, information technology, sales and marketing, supply chain management, facilities, materials, and human resources.

As a Gorbel employee, you will join a diverse, dynamic team of highly motivated professionals who bring with them a wide array of talents, skills, and backgrounds. The hallmarks of Gorbel employment are Values & Culture, Teamwork, and Growth, and they help guide the experience of all Gorbel employees.

“ The feeling of being a part of a larger family and a sense of openness and transparency within the organization sets Gorbel apart from other companies. Gorbel is also innovative and constantly thinking on how to improve our existing technology. ”

Aabhas Sharma
Software Engineer
